## Remark

- And then , we checked and clear the machine cab's hardness before install new monitor (with controller):

30. 4. 2025

- At morning , we continue to inspected the cab hardness and then we installed the new monitor and test-runs it.

- It was Ok.

- After that we disassembled and cleaned the replacement boom rod and head .

- And we assembled it with new seals and installed to machine .

- And test-runs the machine around 10 hrs. All was Ok .

- That replacement boom cyl; rod and head is supplied by customer from his other machine

1 . 5 . 2025

- At morning we suggested the machine daily maintenance to machine operator and site supervisor .

- And also discuss with customer for machine condition and for used genuine parts and service .

- He also accepted that and understand it
